

**SINGLE-USE CBD GEL PACKS**  
**(15mg Water-Soluble CBD, Micro-Encapsulated, Broad Spectrum Hemp Oil, 0.0% THC)**

Our single-serve CBD Gel stick packs provide a premium marketing option. The gels are simply squeeze-applied directly into the mouth. Each formulation contains broad spectrum hemp oil that has been produced using micro-encapsulation technology. This greatly increases the absorption as well as the utilization of the CBD. This proprietary delivery system is technically called "liposomal micro-emulsion". Liposomes are used to encapsulate CBD molecules, making them highly bio-available and able to be absorbed into the body, as well as highly bio-active and able to actually be assimilated and utilized by the body. Absorption and utilization of the CBD, is estimated to be increased by up to 7 times, compared to industry standard CBD oil. Specific natural Terpenes can also be added to any formulation, to create specific products such as CBD Relief Gel, CBD Sleep Gel, CBD Focus Gel, CBD Energy Gel, CBD Relax Gel, etc.

**SINGLE-USE CBD WATER ADDITIVES**  
**(15mg Water-Soluble CBD, Micro-Encapsulated, Broad Spectrum Hemp Oil, 0.0% THC)**

Our single-dose CBD water additives are innovative and less expensive than industry standard bottles of CBD water. We offer both liquid CBD stick packs and powder CBD stick packs. Each formulation contains broad spectrum hemp oil that has been produced using micro-encapsulation technology. This not only allows the CBD to be completely dissolvable in a bottle of water, but also greatly increases the bio-availability of that CBD, allowing it to be highly absorbed into the body. In addition, this also greatly increases the bio-activity of the CBD, allowing it to be highly assimilated and actually utilized by the body. Specific natural Terpenes can also be added to any formulation, to create specific products such as CBD Relief Water, CBD Sleep Water, CBD Focus Water, CBD Energy Water, CBD Relax Water, etc.
